Who We Are:

Softtik is a Game and blockchain solution provider-Known to develop scalable & agnostic apps like Play2Earn Games, VR/AR/XR Games, Move2Earn Games, CEX/DEX/P2P Exchange, IDO/ICO/STO, Digital Wallets, 3D NFT, 2D NFT and customized solutions for enterprises to power up blockchain solutions like smart contracts & distributed ledger. Softtik intellectuals adopt a client-centered approach to reach ideal blockchain use cases that ultimately aids in creating innovative strategies to accelerate deployments. Softtik experts throughout the globe squeezed their collective experiences & domain expertise to deliver the best-customized blockchain solutions at the enterprise level.

Why NFT Games?

Non-fungible tokens (NFTs) are unique digital tokens that “live” on blockchain. NFT can’t be copied and pasted, which means each item is cryptographically unique, like a digital version of the Mona Lisa.

NFTs are used as in-game items, characters, and avatars that players need to successfully play a game. The value of these assets depends on their rarity and importance in the game. Players can trade these in-game assets for cryptocurrency on a marketplace, and all transactions are recorded on the blockchain.

NFT games allow players to earn cryptocurrencies for playing and provide new monetisation models for game developers. It also offers an opportunity to do real-world transactions with other players, which can be very lucrative.

Our Games:

Meta Warriors – P2E:

It is a play to earn, third person zombie shooting game. Meta Warrior has 3D NFT characters which gamers can play within the game. Prototype is already launched on Android, WebGL and Oculus

RACE ACROSS AMERICA

Our Games:

MetaVerse:

The term metaverse has become increasingly popular in recent years as a growing number of businesses embrace its status as the technology of the future economy. While the word is getting more commonly used as "internet" and "online," its definition can still be quite vague. Since the metaverse is being described as the next "big thing,"
